. not working does the window manager matter for the distro type i'm using? C_K_: what version ubuntu you trying to use? 14.04 C_K_: re-ask your issue in channel, also try ubuntu+1 !14.04 | C_K_ C_K_: Ubuntu 14.04 LTS (Trusty Tahr) was the 20th release of Ubuntu. End-of-life was April 25th, 2019. Paid support (ESM) is available from Canonical's subscription services, which can be configured to receive early access to new releases. ok C_K_: we dont support end of life versions here i'm just trying to make sure i'm not missing anything C_K_: for #ubuntu+1 please do you know if fuduntu is a good place to go for ubuntu support? C_K_: please ask yourself this, what you want to do exactly? I'm curious how different the distros are and i don't want to install crap C_K_: there are many different distros to choose from, try them all C_K_: ubuntu uses a mainline kernel, so you should be able to install whatever you like i just don't want to screw things up C_K_: as long as you dont touch your system, you will be fine C_K_: if you dont want to start 'fixing' things, you will be fine what about setting up partitions and then deleting them? C_K_: if you want to try kali-linux join #kali-linux please i'll try them all then C_K_: we only support ubuntu here this 82157476af
